

V700 instructions for Google Voice

-- Setting PIN1 --

If your cellphone is trusted by google voice and does not require you to enter a PIN to access services then set PIN1 to "2"

otherwise enter "xxxx*2" where "xxxx" is your google voice PIN number

-- Log In

-- use password 8888

---- Set Access

----- ACC1 Number - Enter "##xxxxyyzzzz" where xxxyyyzzzz is your Google Voice number

---- Set Dial Plan

----- Catch Prefix for Acct 1 - To catch all numbers use "1*2*3*4*5*6*7*8*9*" to instruct the dialer to use account #1 for any number starting with 1,2,3,4,5,6,7,8 or 9

----- I didnt want dial an overseas call with google voice so I didnt include "0"

---- Bypass prefix - Set this to "911*0*" so that 911 and overseas calls will not use google voice

---- Other Settings

----- Ending Code - Set this to "#" so that it will dial a # after dialing

----- Mode 2 - This is actually the default.
